Environmentally Safe

Non - Biodegradable

Simply sprinkle **ABSORB-N-DRY** granules generously over the soiled area, let stand for a short time, then sweep up. For particularly stubborn spills or stains use a stiff broom to work the granules over the area, then sweep up. For flowing liquids, pile **ABSORB-N-DRY** around the area creating a dam. Always use good housekeeping procedures and dispose of spent granules in accordance with local, state and federal regulations.
